

ALBANY MUSEUM OF ART

**We value the safety and well-being of our visitors and make every attempt to keep the museum open and accessible to all. It is for this reason we are carefully monitoring the news about the spread of COVID-19 (coronavirus) and we have implemented safety measures recommended by the Centers for Disease Control to prevent the spread of the disease.**

Below you will find more information on current museum hours, upcoming events, and the proactive measures we are taking in response to these public health recommendations.

### **Hours of Operation**

The AMA will remain open to visitors during normal operating hours, listed at [www.albanymuseum.com](http://www.albanymuseum.com). However, our goal is to act with prudence and caution in regard to visitor safety, which is why we continue to monitor the updates and recommendations of federal, state, and local authorities about the impact of the virus on our community.

If it becomes necessary to change our operating hours, we will provide notification on our website and via social media channels. If you have questions, please call the AMA at 229-439-8400.

## **Upcoming Events and Programs**

Programs and upcoming events are currently scheduled to take place as planned. However, the AMA is implementing flexible refund policies should classes, workshops, or special events be postponed or cancelled, or if any visitor or student is unable to attend due to illness or concern over their health.

## **Safety During Your Visit**

The AMA will continue to maintain its high standards of cleanliness throughout all of its spaces. We have also installed a hand sanitizer station at the front desk, which we encourage all guests to use during their visit, and we have increased daily cleaning of high-traffic areas and common surfaces.

**Other safety recommendations from public health authorities include the following:**

- wash your hands often for at least 20 seconds using soap and water after visiting public spaces or sneezing/coughing
- if soap and water are unavailable, use hand sanitizer
- if you are sick, stay home
- avoid contact with sick people
- avoid touching your face (eyes, nose, mouth, etc.)
- avoid handshakes and hugs
- cover your mouth and nose when you sneeze with a tissue, or use the inside of your elbow

For additional information, please visit the Centers for Disease Control's website.

Thank you for your understanding as we implement these necessary measures.
