

Land That I Love

Albany Museum of Art | Pre-Vist Activity

Nature and art are like best friends! We find art in nature and the beauty of our world, and many artists love to create art that is of or about the nature around us! When you come to the AMA, you will see how these two things work together to help us learn about our environment. But first, think about the following questions and write down your responses!

Where do you see art or beauty in the nature around us?

What do you love about the land that you live on?

Water is so important to art and nature, what body of water runs through Albany, Georgia?

Talk with your class about why water (rivers, lakes, oceans, etc.) is so important to life on earth!
